October 10, 2019

Respectfully,

I would like to integrate myself in the study of air quality, since I am trained and have the skills to develop different tasks.

I finished my Bachelor studies at the University of Havana Cuba, in the Bachelor of Meteorology degree. I am currently in the process of titling the Master in Earth Sciences at the National Autonomous University of Mexico. The studies of these years have brought me knowledge in Climatology, Climate Change, Agricultural Meteorology, Atmospheric Chemistry and other branches of meteorology. Throughout my training, I have strengthened my spirit of teamwork, initiative and involvement in tasks.

I have also had the opportunity to develop my first work experiences whose details you will find in the Curriculum Vitae.

I am at your entire disposal to conduct an interview and the tests you deem appropriate.

Sincerely,

**Angel Luis Martínez Araujo**
